

FOR PITCHED ROOFS

EAP-SLING

Single anchor point

EAP-SLING-11 is perfect for use on a pitched roof as a single anchor point. The EAP-SLING-11 single anchor point from INNOTECH requires only a small wood dimension, and blends in perfectly with the building aesthetics because of its discreet appearance.

- single anchor point for pitched roofs
- optimum integration with the building aesthetics; specially suitable for listed buildings
- fast installation without special tools

The effect of the EAP-SLING-11 on the architectural surroundings is very unobtrusive, and it is particularly suitable for listed buildings. The simple fastening option saves additional time during installation.

- various sling lengths available upon request
- Certification to the latest state of the art:

EN 795:2012 TYPE A + B
