TRANSLATION

- (11) Appendix to
- (12) **Type Examination Certificate**
ZP/B200/20
- (13) 13.1 Subject and Type
Anchor device type A
Type: SAND-01

13.2 Description

The anchor device of type SAND-01 is used to protect a maximum number of three people against falls from a height. The anchor device of type SAND-01 is intended for assembly on suitable surfaces of sufficient strength. Appropriate fasteners are used to fix the anchor device directly to the structure. In the centre of the plate there is a drill hole which receives an attachment eyelet via a securely fastened hexagonal bolt (M 16). The user connects his Personal Protective Equipment to this anchor point to protect himself against falls from a height.

The anchor device is intended to bear loads exerted parallel to the assembly surface from any direction. In addition, the product, then labelled as AIO-SAND-01, is used as a component in the rope system of type INNOTECH ALLinONE.
